Simply Beautiful

One of the most vibrant months of the year is upon us! Not only do **annuals** and **perennials** give colour; you can also expect to see lovely blooms from the following shrubs: **Cistus, Hebe, Hydrangea, Potentilla, Spiraea & Vinca**, to name a few.

Philadelphus (mock orange) can be pruned now, together with **Weigela**, and any **deutzias** that have finished flowering. Cut out old flowered shoots and take the opportunity to cut out any crowded, old wood completely.

Top 3 Garden Jobs

1. **Feed, water and deadhead** summer bedding **regularly**, in your pots, borders and hanging baskets
2. **Deadhead** your roses to promote more flowers. Leave the flowers in place if your rose produces attractive hips (seed pods)
3. Cut back **repeat-flowering perennials** after the first flush of flowers to encourage a second flowering period. Feed after cutting them back.
